

Alula Video and Cameras

Introducing a new, industry leading service by Alula. Video, Security and Automation under one unified platform powered by a natural and intuitive user experience. In just seconds put the power of a comprehensive video platform at your customers finger tips. A video eco-system that lives inside the Alula Experience, seamlessly delivering event based visual alerts stored in the cloud.

A Natural User Experience:

Elegant in app navigation that includes control of security sensors, automation and video devices that work together on a single screen in a single app.

Easy Enrollment:

Industry leading enrollment speed will have your customers cameras up and running in seconds. Provisioning at the pace of the future.

Drive RMR with One Solution:

Video, Automation and Security all in one. Offer a video solution that beats the competition by offering a single experience that makes sense. Increase account value and simplify your business!

Video services engineered for the future:

- **Hybrid Storage:** Local SD camera storage and backed up in the cloud.
- **Storage and Access:** This is the way your customers want it. Latest video events are always accessible and most recent clips are always retained. Total volume is pooled, not limited to each camera.
- **Multi-Site Control, Single Account:** Any camera on the account can be added to a dashboard or group. User level authorization on a per camera basis, controllable in the app.

RE 703 – Video Doorbell

The Alula Video Doorbell with built-in microphone, speaker, and PIR detection. Also included are installation accessories, and angle adjustment brackets.
